

GLOBAL SPECIALTY LINES (RE)INSURER, City of London

Desk with a view, overlooking 'The Gherkin', 30 St Mary Axe

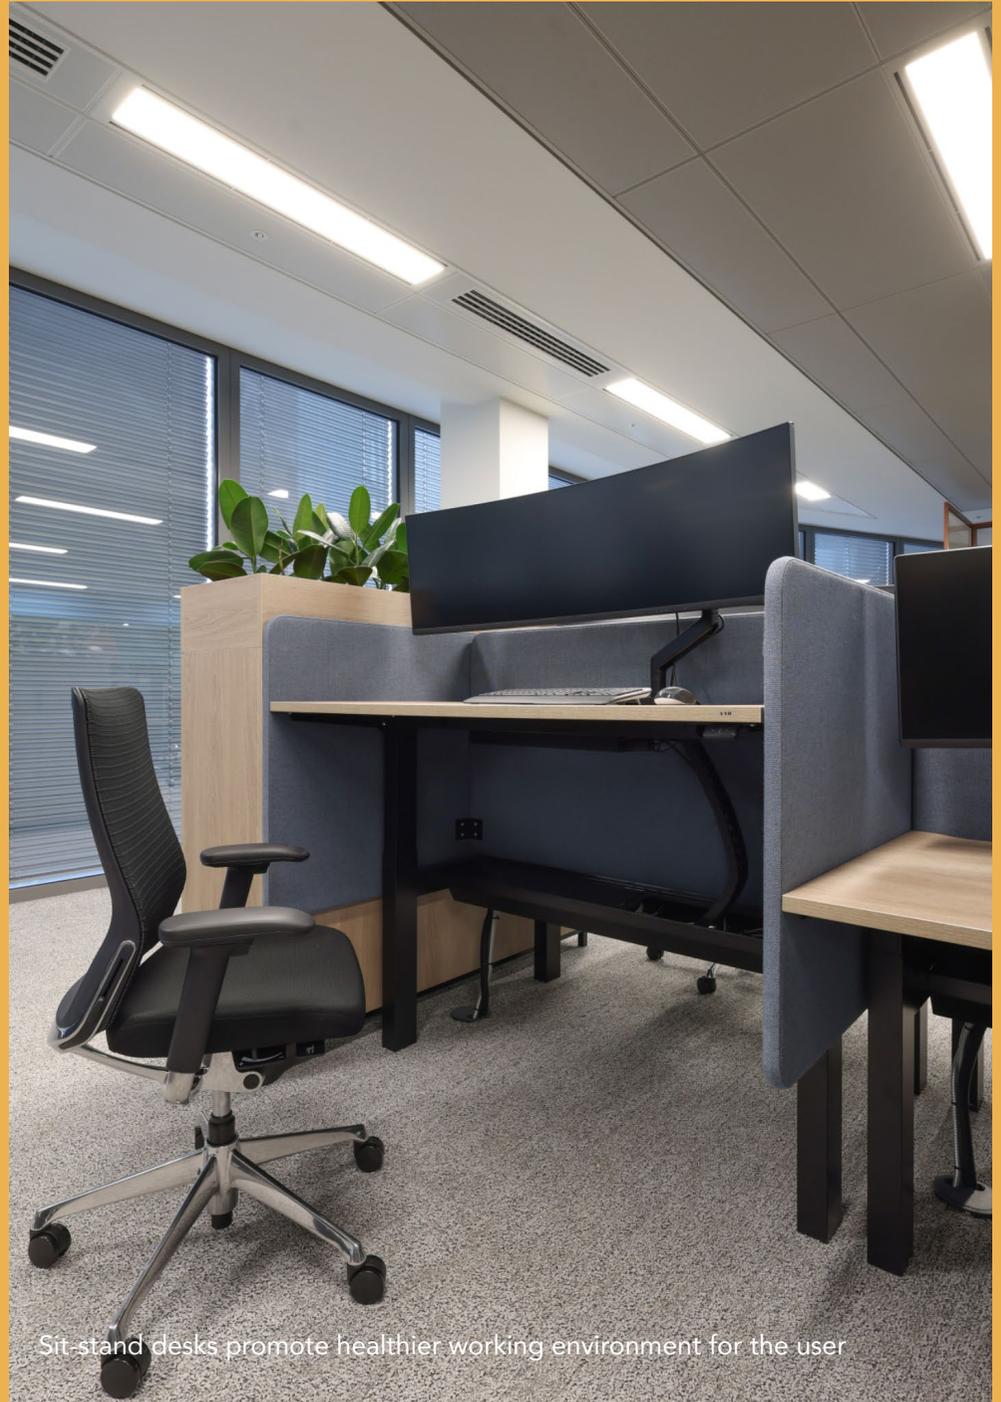

We are very proud to share this case study of global specialty lines (re) insurer, Canopus Group, at their beautifully designed workplace, within the iconic 22 Bishopsgate building.

Working alongside the client, Day 2 Interiors and HLW, DAS provided a total of 126no DATUM 'open-plan' sit-stand desks and 66no 'High-Focus' sit-stand desks with wrap-around upholstered screens.

High-focus desks within the open plan space

Sit-stand desks promote healthier working environment for the user

The DATUM Flux desks were manufactured with Egger laminated tops for a slightly different aesthetic to the norm.

The 'High-Focus' sit-stand desks are the same as the open plan positions but with wrap-around fabric screens that stay in a fixed position as the desk is raised and lowered.

Other key project features are inset power, USB charging and hinged covers on the cable trays.

As the name suggests, the “High-Focus” positions are used by staff who need quiet, concentrated time, but do not want to use closed pods or booths to do so.

Some of the high focus desks were made to a custom size to fit within bespoke joinery pieces designed by HLW.

Power modules inset to the work surface for user convenience
