CASE STUDY

Houlihan Lokey

WORKPLACE 

The challenge with Houlihan Lokey was ensuring that each user had as much privacy as possible in an open plan office, regardless of whether they were sitting or standing.

We created a custom DATUM Flux+ desk with fabric panels to 3 sides to achieve this, whilst maintaining a soft, attractive aesthetic.

Alongside Tsunami Axis, Modus and Aura Consulting, we provided 308 custom positions for this Global independent investment bank in Central London

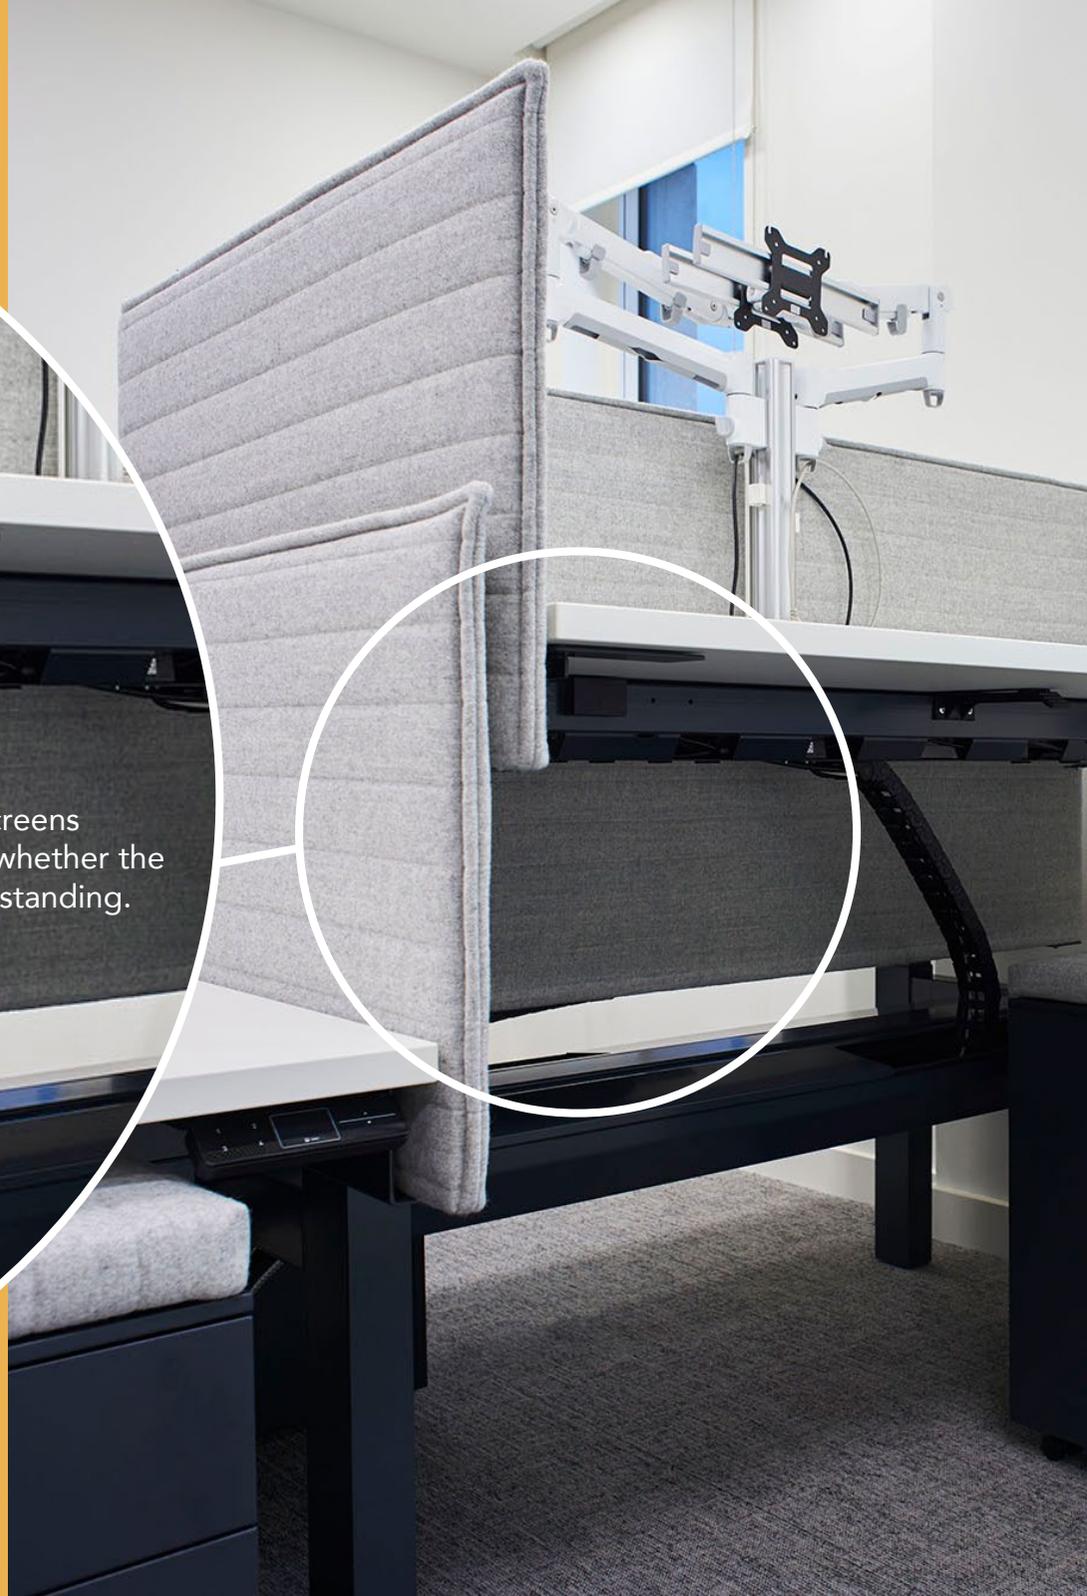

Open plan working environments need a modicum of privacy. When concentration is important, the 3 sided desk screens provide the perfect solution.

Custom fabric screens provide privacy whether the user is sitting or standing.

Simple electric controls are not only easy to use but are programmable so that users can adjust automatically and efficiently.
